

Ms. Oumaïma Makhlouk

Data Focal Point for the Major Group for Children and Youth

Oumaima Makhlouk is a passionate advocate for using AI to drive the Sustainable Development Goals (SDGs). As a Data Focal Point for the Major Group for Children and Youth, she supported the creation and organization of the annual global UN Datathon, mentoring participants to create innovative, AI-driven solutions for SDG challenges. Oumaima has also been serving as the lead AI/ML instructor at the Impact Genius AI for Good Institute at Stanford, empowering future leaders to develop AI-driven startups for global impact. With experience as a data scientist at Intel and a consultant at the World Bank, she combines technical expertise and a commitment to using AI for social good, championing youth-led innovation and creating impactful solutions for a sustainable future.
