

## **ECOSOC - Operational Activities Segment 2023**

### **Session 8: Dialogue with Executive Heads**

#### **Swiss statement**

We welcome the opportunity of having two agencies on the same panel that don't share the same governing boards to address our comments to.

We would like to follow up on one comment that was made earlier – that we need to see results and focus on impact rather than on processes 5 years into the reform.

We would therefore be interested to hear how agencies share challenges and lessons learnt in areas of joint engagement.

The new Integrated Results Frameworks of the 4 Funds and Programmes detail areas of joint engagement and indicate common and complementary indicators that are shared with other agencies. As board members we would be interested to hear both from an individual agency but also collective perspective on achievements and challenges in areas of joint engagement.

Could you share with us how you engage in knowledge management and joint monitoring in these areas of joint engagement?

Thank you.
