

## **Australia's interventions from the floor**

*Day Three: Session Two Integrated implementation of the 2030 Agenda: the role of the UNDS in LDCs, LLDCs, SIDSs and countries emerging from conflict*

Key points:

- First to thank to all the speakers on this very important topic.
- Given some of the difficulties that have been recognised for LDCs, LLDCs, and SIDS (including currency fluctuations) I would like to ask the panellists where they see the best opportunities to capitalise on the new agenda, for example new financing flows coming from increased capitalisation of the WBG, new UN financing modalities like GCF with have results in increased flows to SIDS for examples, and where partnerships are of particular interest or importance.
