STATISTICAL COMMISSION
Eleventh session
Item 10(b) of the provisional agenda

COMPENDIUM OF SOCIAL STATISTICS 1963

OUTLINE OF CONTENTS

Attached is the Outline developed in the discussions of the Working Party on Statistics for Social Programmes (see E/CN.3/268).

OUTLINE OF CONTENTS OF "COMPENDIUM OF SOCIAL STATISTICS 1963"^{1/}

I. POPULATION AND VITAL STATISTICS

- Table 1.1. - Total population. Latest two censuses. Intercensal rates of increase.
- Table 1.2. - Total population and percentage distribution by sex and age. Latest census.
Age: Under 5, 5-14, 15-64, 65 and over.
- Table 1.3. - Total population and percentage distribution by marital status, sex and age. Latest census.
Marital status: Single or never married, married (including persons in de facto unions), widowed and divorced.
(Categories defined in ST/STAT/SER.M/27, paragraph 410).
Age: Under 15, 15-49, 50 and over.
- Table 1.4. - Total population and sex ratios by size of locality. Latest census.
Size of locality: 50,000 and above
20,000 to 49,999
10,000 to 19,999
less than 10,000
not in identifiable localities.
- Table 1.5. - Total population and percentage distribution by size of locality, and intercensal rates of increase by size of locality. Latest two censuses.
Size of locality: Same as in Table 1.4.
- Table 1.6. - Total population and proportion dependent on agriculture. Latest census. Dependent population: members of households whose head works in agriculture.
- Table 1.7. - Average crude birth and death rates,* migration, and rates of increase. 1945-1949, 1950-1954, 1955-1959.
(Average annual rates per 1,000 population).

^{1/} For first Draft Outline, see E/CN.3/239, Annex I.

* Deemed to be of particular health significance.

*Table 1.8 - Average infant mortality, neo-natal and late infant mortality rates. 1945-1949, 1950-1954, 1955-1959. (Average annual rates per 1,000 births).

*Table 1.9 - Expectation of life (e_x^0) at specified ages, for males and females. 1950 and 1960.
Ages: 0, 1, 15 and 65.

II. HEALTH CONDITIONS

(In addition to those items listed in Section I shown to be of health significance).

Table 2.1. - Proportional mortality ratio above 50.

Table 2.2. - Proportional mortality from infectious and parasitic diseases.

Table 2.3. - Mortality rate from all causes, age 1-4.

Table 2.4. - Endemic presence of pestilential quarantinable diseases: cholera, smallpox and typhus.

Table 2.5. - Endemic presence of malaria.

Table 2.6. - Availability to the population of protected water (percentage of the population to which protected water is made available).

**Table 2.7. - Number of hospital beds in relation to the population.

**Table 2.8. - Number of physicians in relation to the population.

III. FOOD CONSUMPTION AND NUTRITION

Table 3.1. - Calorie levels compared with estimated requirements for the country as a whole. 1951/1952-1953/1954 and 1957/1958-1959/1960. (Calories per capita per day and difference between consumption and requirement as a per cent of requirement).

Table 3.2. - Protein levels for country as a whole. 1959/1960. (Total and animal protein grammes per day per capita).

Table 3.3. - Fat (total and animal) grammes per capita per day. 1959/1960.

** Data in these tables are to be qualified since the social and health effectiveness of hospital beds and doctors varies with local conditions, as do also criteria definitions in respect of them.

/...

Table 3.4. - Per capita food consumption of principal commodities. 1959/1960.
(Kilogrammes per year).

Commodities: Cereals, potatoes and other starchy roots,
sugar and syrups, pulses and nuts, fruits, vegetables, meat,
eggs, fish, milk, fats and oils, and others.

Table 3.5. - Percentage of total calorie intake derived from cereals, starchy
foods, and sugar for the country as a whole. 1959/1960.

Table 3.6. - Calorie levels by expenditure levels in urban and rural areas.
1959/1960.

Income or expenditure groups: According to country
classifications.

Table 3.7. - Protein levels, total protein and animal protein by expenditure
levels in urban and rural areas. 1959/1960 or latest available.

Income or expenditure groups: (Same as in Table 3.6).

Table 3.8. - Per capita food consumption of principal commodities in calories,
and expenditure thereon, by expenditure levels in urban and rural
areas. 1959/1960 or latest available.

Commodities: (Same as in Table 3.4).

Income or expenditure groups: (Same as in Table 3.6).

Table 3.9. - Proportion of total calorie intake derived from cereals and starchy
foods, and proportion of total food expenditure spent on cereals
and starchy foods by expenditure levels in urban and rural areas.
1959/1960 or latest available.

Income groups: (Same as in Table 3.6).

IV. HOUSING

Table 4.1. - Housing units and population (occupants) by class of housing unit.
Latest census.

Class of housing unit: Dwellings;
Rustic, improvised and not intended
for habitation;
Collective housing units;
Other (mobile, etc.);
Not stated.

/...

Table 4.2. - Urban dwellings with piped water* and/or flush toilet inside the dwelling. Latest census.

Per cent with piped water.

Per cent with flush toilet.

Table 4.3. - Number of dwellings; average number of persons per room; per cent of dwellings with three or more persons per room; and per cent of dwellings with one or two rooms. Urban and rural. Latest census.

V. EDUCATION AND CULTURAL ACTIVITIES

Table 5.1. - Population 10 years of age and over by literacy, sex and age.

Urban and rural. Two most recent censuses.

Literacy: Literate, illiterate, not stated.

Age: 10-14, 15 and over, 15-64, 65 and over.

Table 5.2. - Adult literacy rates: Per cent population 15 years of age and over, able to read and write, by sex. Index of educational attainment: median number of years of formal schooling completed by the population 25 years of age and over, by sex. Urban and rural. Two most recent censuses.

Table 5.3. - Population 25 years of age and over by level of education and sex.

Urban and rural. Two most recent censuses.

Level of education completed: less than primary, primary, secondary, higher, and not stated.

Table 5.4. - School enrolment ratios. Enrolment as per cent of children of selected age groups.

Total primary and secondary: ages 5-19. Primary: ages 5-14.

Secondary: ages 10-19. Latest available year.

Table 5.5. - Higher education enrolment. Number enrolled per 100,000 population. Latest available year.

Table 5.6. - Percentage of girls to total enrolments in primary, secondary and higher education schools. Latest available year.

Table 5.7. - Number of teachers in primary schools and average number of pupils per teacher. Urban and rural. Two most recent school-year periods.

/...

Table 5.8. - Newspaper circulation and newsprint consumption. (Number of newspapers published and circulation per 1,000 population. Newsprint consumption in kilogrammes per capita per year, two periods). Latest available year.

Table 5.9. - Radio receivers per 1,000 population. (Licences issued or estimated number of receivers). Latest available year.

VI. LABOUR FORCE AND CONDITIONS OF EMPLOYMENT

(a) General

Table 6.1. - Total population and per cent economically active by age and sex. Latest available data.

Per cent economically active by age: Total, less than 15, 15-64, 65 and over.

Table 6.2. - Economically active population by sex and status. Totals and percentage distribution. Status categories: employer, employee, own account worker, family worker, member of producers' co-operative, not classifiable. Latest available data.

Table 6.3. - Economically active population by sex and occupation. Totals and percentage distribution. Latest census.

Occupation: (Major groups of ISCO, ILO).

0. Professional, technical and related workers.
1. Administrative, executive and managerial workers.
2. Clerical workers.
3. Sales workers.
4. Farmers, fishermen, hunters, loggers and related workers.
5. Miners, quarrymen and related workers.
6. Workers in transport and communication occupations.
- 7 and 8. Craftsmen, production process workers, and labourers not classifiable elsewhere.
9. Service, sport and recreation workers.
10. Workers not classifiable by occupation.

/...

Table 6.4. - Economically active population by sex and industry. Totals and percentage distribution. Latest census.

Industry (Major divisions of ISIC (ST/SER.M/No.4, Rev.1)).

0. Agriculture, forestry, hunting and fishing.
1. Mining and quarrying.
- 2 and 3. Manufacturing.
4. Construction.
5. Electricity, gas, water and sanitary services.
6. Commerce.
7. Transport, storage and communication.
8. Services.
9. Activities not adequately described.

Table 6.5. - General level of unemployment number and per cent of unemployment, 1951-1960.

(b) Agricultural Labour

Table 6.6. - Number and area of agricultural holdings by size of holding and tenure and percentage distribution. Latest census.

Table 6.7. - Number and area of holdings by legal status of holder, by size of holding. Latest census.

Table 6.8. - Number and percentage distribution of persons employed on holdings in selected weeks during the census year, by size of holding, and categories of employment. Latest census.

Categories: holders and unpaid members of household; participants in co-operative, collective and communal holdings; persons working for pay on the holdings.

Table 6.9. - Farm population by size of holding. Latest census.

Table 6.10 - Use and source of power on agricultural holdings by size of holding. Latest census.

(c) Industry (non-agricultural)

Table 6.11 - Labour income as a per cent of national income. 1951-1960.

Table 6.12 - Consumer prices indices - General indices and group indexes 1951-1960 (1953 = 100).

/...

Table 6.13. - Indices of wages and real wages, in major divisions of economic activity. 1951-1960. (1953 = 100).

General level: Index of wages
Index of real wages.

Major economic activity: Manufacturing
Mining and quarrying
Construction
Transport.

Table 6.14. - Hours of work; general level and in major divisions of economic activity. 1951-1960. Actual hours worked per week.

Industry: General level
Manufacturing
Mining and quarrying
Construction
Transport.

VII: SOCIAL SECURITY

Table 7.1. - Population covered by type of social security scheme and programme. Latest available year. Population in specific age groups, participants and participants per 100 population in corresponding age groups.

Programme: Sickness - maternity
Old age
Invalidity
Workmen's compensation
or employment injury
Unemployment
Family allowance.

Schemes: National workers insurance, railroad workers, etc.

Table 7.2. - Number and ratio of beneficiaries to participants by social security scheme and programme. Latest available year.

Programme and scheme: (Same as in Table 7.1).
(Participants and beneficiaries to be defined by ILO for each programme).

VIII. INCOME AND EXPENDITURE

- 8.1. - National income per capita in real terms^{2/} and average annual rate of growth. 1951-1960.
- 8.2. - Private consumption expenditure per capita in real terms^{2/} and average annual rate of change. 1951-1960.
- 8.3. - General Government consumption expenditure. Totals and percentage devoted to education,^{3/} housing^{3/} and other social services.^{3/}
Averages for 1957-1959.
- 8.4. - Private consumption and expenditure. Totals and percentage devoted to health,^{3/} food,^{3/} education and rent.^{3/} Averages for 1957-1959.
- 8.5. - Private household expenditure distributed by object of expenditure. Urban and rural. Latest years. (By level of expenditure or income if possible). Object of expenditure: Food, rent, fuel and light, health, education and others.^{3/}

^{2/} In terms of 1953 prices.

^{3/} Categories as defined in ST/STAT/SER.F/No.2 and ST/TAA/M/12 - ST/ECA/49.

STATISTICAL COMMISSION
Eleventh session
Item 10 (b) of the provisional agenda

COMPENDIUM OF SOCIAL STATISTICS 1963

OUTLINE OF CONTENTS

(Report of the Secretary-General)

CORRIGENDUM

1. In Tables 3.5 and 3.9 the words "starchy foods" should read "starchy roots and tubers".
2. The following should be inserted at the end of Table 3.9:
[Data for tables 3.6, 3.7, 3.8 and 3.9 - food consumption by expenditure level - are unlikely to be available in time for the first edition of the Compendium.]
3. In Table 5.4, under "Secondary", the ages "10-19" should be changed to read "15-19".
