STATISTICAL COMMISSION
Thirteenth session
Item 3 of the provisional agenda

REVIEW OF INTERNATIONAL STATISTICS

Ukrainian SSR: draft resolution

The Statistical Commission,

Having examined the report of the United Nations Secretary-General on international statistics,

Noting the large amount of work being done by the statistical bodies of the United Nations and its specialized agencies to improve the comparability of statistical data from different countries, especially countries with differing social and economic systems,

Taking into account also the considerable expansion in regional statistical activity in connexion with the carrying out of extremely important statistical, methodological and research work and the publication of the relevant findings, as also with the organization of seminars, fellowships, advisory services and other important activities,

Considering further that it is essential to provide for the inclusion in United Nations publications of the most reliable statistical data in respect of the various countries,

Recommends the Secretary-General:

1. To continue working for the development of technical co-operation among the various countries in the statistical field, paying special attention to the organization of the statistical work and services which will be of assistance to the developing countries in formulating their economic and social development plans;

2. To take the necessary measures to improve the surveys and statistical publications of the United Nations, having in mind the Organization's obligation to collect and publish reliable data and analyses in respect of the various countries.
