3 August 1978

ENGLISH ONLY

STATISTICAL COMMISSION
Twentieth session
20 February–2 March 1979
Item 5 of the provisional agenda. International Comparison Project (ICP)

INTERNATIONAL COMPARISON PROJECT: A REVIEW OF MAJOR
ISSUES AND PLANS FOR ITS FUTURE DEVELOPMENT

Corrigendum

Foot-note 14, second sentence

For In the case of three countries, where I is a price index and j, k and l are countries, there is transitivity when $I = I_{j/1} \div I_{j/1}$ where $I_{j/k}$ is the purchasing power parity (PPP) for the jth country relative to the kth country.

Read In the case of three countries, where I is a price index and j, k and l are countries, there is transitivity when $I_{j/k} = I_{j/1} \div I_{k/1}$ where $I_{j/k}$ is the purchasing power parity (PPP) for the jth country relative to the kth country.
