## **Report of the Intersecretariat Working Group on Price Statistics**

1. A brief note on the work of the Intersecretariat Working Group on Price Statistics was submitted to the Statistical Commission at its thirty-third session.
2. Since then, the work on the revision of the consumer price index (CPI) and producer price index (PPI) manuals has advanced and most of the chapters are being finalized. A list of chapters of the CPI manual is provided in the annex.
3. The Working Group and the technical expert groups on CPI and PPIs met formally once in London from 19 to 21 March 2002, when a joint session of the technical expert groups was held. The purpose of the meeting was to review the overall content and pending substantive issues, especially in the light of the observations made at the thirty-third session of the Commission, and also to approve completed chapters, focus and agree on the plan for finalizing the work and develop publication strategies. Publication of a single book on each price index is expected to be preferable from the users' point of view and is also the most cost-effective option.
4. The structure, content and chapter ordering of the CPI manual were reviewed once again to accommodate the concerns expressed at various meetings that to many users the manual would appear as too theoretical for their needs. There was a general agreement that a better balance between operational and theoretical chapters could be achieved by: (a) elaborating more on issues that are particularly relevant for developing countries, e.g., price collection from outlets without permanent address and bargaining prices; (b) simplifying and shortening the theoretical chapters to the extent possible; (c) moving theoretical chapters to the end of the manual; and (d) providing an introductory overview of all the issues discussed in the manual, with detailed references on how those were discussed in both the operational and the theoretical chapters. The new chapter sequencing is set out in the annex. It was agreed that the PPI manual would conform to the structure of the CPI manual.
5. The structure and draft chapters of the revised CPI manual were briefly considered at an Economic Community of West African States meeting on the harmonization of national accounts and CPIs, held in Togo from 16 to 18 September 2002.
6. The final meeting of the CPI technical expert group was held in London on 14 and 15 October 2002. A small group of authors/reviewers met together to resolve a number of outstanding drafting/technical issues, especially with respect to the terminology used and to approve the manual. The finalized draft was expected to be ready before the end of December 2002.
7. The final meeting of the technical expert group on PPIs is scheduled to be held from 25 to 27 February 2003 in Washington, D.C. The expert group expects to have completed the manual by May 2003 and to hold a focus group meeting of PPI manual users in June 2003. Final publication is anticipated for early fall 2003, incorporating the conclusions of the June meeting.

## Annex

### Consumer Price Index Manual

#### List of chapters

Preface (including acknowledgements)

Reader's guide

#### *Chapters*

1. Introduction
2. Uses of CPIs
3. Concepts, scope and classifications
4. Expenditure weights
5. Sampling issues
6. Price collection
7. Adjusting for quality change
8. Item substitution and new products
9. Overview of CPI calculation
10. Some special cases
11. Errors and bias
12. Organization and management
13. Publication and dissemination
14. The system of price indices
15. Basic index theory
16. Axiomatic and stochastic approaches to indices
17. The economic approach
18. Aggregation issues
19. Numerical examples
20. Elementary indices
21. Quality change and hedonics
22. Seasonal products
23. Durables and user costs
